

Your Eye on Solutions for Business Intelligence. SM

Insurance

Hedging against *risk* requires the correct tools and a strong consulting partner.

MBIA: Is engaged in providing financial guarantee insurance, investment services, and municipal and other services to public finance and structured finance clients on a global basis. MBIA is currently on Fortune 1000 and Russell 3000 with over 2.7 Billion in revenues.

From June 06' to present, TLC Technologies has been providing MBIA with Consulting-on-DemandSM services focused around their Essbase 6.5.7, EIS, and Execviewer applications. The production environment consists of twelve Essbase cubes that are running calculations daily, weekly, and monthly. TLC is responsible for monitoring production, trouble-shooting problems with inbound and outbound data, as well as on-call for enhancements to the cube structure or process flow based on current world events that may have an adverse effect on *risk*.

The environment consists of multiple servers. Prior to TLC assuming the responsibility for the environment, users and senior management were extremely disappointed with the performance and maintainability of the applications. TLC was able to improve processing with a 1/3 FTE, what previously had been maintained by one FTE in an unacceptable manner.

TLC Technologies is currently in discussions with senior management to replace their current Oracle / Hyperion tools with System 9.
