Hyperion Essbase

TLC Technologies was very patient and accommodating during our software selection process. They presented solid solutions to our current needs, forecasted future needs accurately and assisted us in selecting a platform that will allow us to expand as we grow.

TLC's recommendation of the Hyperion suite was the correct call for our needs.

We look forward to the continued relationship with TLC during the development & implementation of our various applications on the Hyperion platform.

Director, Business Apps.

Oracle's Hyperion Essbase module: TLC's client is a trusted leader in Tax Technology Solutions. Since 1978, over 10,000 corporate customers have relied on the client for innovative tax processing solutions. Combining advanced technology, sophisticated software, and an exceptional team of experienced tax experts, the client helps their customers unlock huge process and productivity gains, limit risk, and make tax a more integral, strategic contributor to business success. Their offerings are data-driven, open-architecture approach to tax technology that integrates all direct and indirect tax processes and technologies with host financial system applications on a single platform. The result is increased efficiency, control, transparency and strategic decision making for Tax and Finance departments.

The client is known for straight talk and keeping promises. Which is why so many global leaders, from American Honda Motor Company to Bristol-Myers Squibb, Callaway Golf, Hewlett-Packard, Mercedes Benz USA, Merck, Pepsi, SAP, Starbucks, Verizon Wireless, and thousands of others depend on the client's software every day.

Business Challenge:
The Client was leveraging some older technology for their Budgeting and Financial Reporting needs. The software vendor of the legacy software decided to discontinue product line used for the existing applications. Therefore, the client was presented with a option of re-implementing the application using the legacy vendor's new product line or select a new software platform for the replacement applications. The client engaged TLC Technologies to assist them in vetting a Hyperion Essbase solution.

Solution:
TLC worked with the client's business resources to determine the high level functional requirements and then ran several Hyperion software demonstrations and developed a Proof-of-Concept application to show the client how Oracle's Hyperion platform would meet the company's current & future needs.

The client selected Oracle's Hyperion Essbase software and TLC is working with representatives from the client's functional team to implement the Essbase solution. TLC is executing the consulting engagement using a "training & mentoring" approach so that all development is visible to the client resources and in many cases created by the client resources with TLC observing and guiding the development process.
